The UC Office of the Treasurer is in negotiations with the Presidio Corporate Center for a lease agreement for 100,000 square feet of office space at 3333 California Street—formerly the Fireman's Fund Insurance Company building—to house some UCSF support units. The move would:

- Consolidate some units now spread over different parts of the campus and in satellite locations.
- Free up space on the Parnassus campus for academic use, including classroom and research space.
- Free up additional university-owned houses on Third and Fifth Avenues, now used as office space, for housing for faculty, staff and students.

If the move goes through, a shuttle service will be established between the Parnassus campus and 3333 California Street.

Staff now are consulting with vice chancellors, deans and Academic Senate members to determine which campus units could move and to ensure that adequate services remain on Parnassus. If lease negotiations are successful, units could begin relocating in early spring 1985, according to Tom Rolinson, vice chancellor, Resource Management and Planning Services.

At a public meeting of two committees of the SF Board of Education on Tuesday, November 27, Tom Gwyn, assistant chancellor of Public Programs, will inform the Board that the campus is looking at a revised lease and proposal for housing on a smaller portion of the Poly High School site—reserving one acre, including the women's gym, for the School District's use. The revised campus plan is in response to the committees' request, because the School District may want to develop a small high school there.

According to Gwyn, in the revised proposal the campus is exploring retaining the existing academic buildings, surface parking for residents and visitors only and a swimming facility based on the results of a campus recreation survey.

Charles B. Wilson, MD, an internationally renowned UCSF neurosurgeon, has been appointed to the recently established Tong-Po Kan Chair in Neurological Surgery at UCSF.

The Tong-Po Kan Chair was endowed by Yuet Wai Kan, MD, UCSF professor of medicine and biochemistry/biophysics, in memory of his father, to support teaching and research. The Chair will fund UCSF Department of Neurological Surgery research in the area of intracranial neoplasms.

Wilson, professor and chair of neurological surgery since 1968, has pioneered treatments of pituitary adenomas and benign and malignant tumors of the nervous system. Director of the UCSF Brain Tumor Research Center, he has authored over 400 scientific publications and has received numerous honors. The journal *Surgical Neurology* recently named Wilson 1984 Neurosurgeon of the Year.

Tong-Po Kan, for whom the chair is named, was the highly respected founder and chairman of the Bank of East Asia, Ltd, Hong Kong. Born in 1884, he founded the first Chinese Bankers' Association and served as advisor to the Hong Kong Board of Finance. Kan took a keen interest in education and was a life member of the Court of the University of Hong Kong. He died in 1963.

Yuet Wai Kan, the donor of the endowment, is a world leader in the application of molecular biology to human genetics. He is an investigator of the Howard Hughes Institute and the Louis K. Diamond Professor of Hematology at UCSF.

The 100th anniversary of the birth of former Hooper Foundation director Karl Friedrich Meyer, will be celebrated on Friday, December 7, from 3:30 to 5 p.m. in HSW 301. Stanley Falkow, PhD, professor and chair of the Department of Medical Microbiology at Stanford, will deliver the First Annual Meyer Lecture, entitled "Genetic and Molecular Basis of Pathogenicity in *Bordetella Pertussis.*"

NEWS BRIEFS

(Meyer continued)

Appointed recently to the National Academy of Sciences, Falkow's major research focuses on the molecular genetics of microbial pathogenicity with special emphasis on sexually transmitted diseases, *Bordetella Pertussis* (whooping cough), and extraintestinal *E. coli* infection.

The second director of the George Williams Hooper Research Foundation, from 1924 to 1954, Karl F. Meyer was born in a suburb of Basel, Switzerland. He came to UCSF in 1913 as associate professor of bacteriology and protozoology and became acting director of the Hooper Foundation in 1921.

Meyer made the California canning industry possible by devising a way to prevent botulism. He also was the first to show how to eliminate psittacosis from large flocks of commercial poultry and was internationally known for his work on plague, rabies and tropical diseases. He died in 1974.

A film documenting Meyer's work on western equine encephalitis will be shown before the lecture. Donated by the Walter Reed Army Institute of Research, the film recounts Meyer's research trip to Fresno to obtain the head of a farmer's dying horse, which he rushed back to San Francisco.

A reminder to all UC employees: All forms to change health, dental and life insurance plans must be in the Accounting Office, 322 CED, or the Personnel Office, LH 150, by 5 p.m. on Friday, November 30. If forms are hand-delivered, the Accounting Office is located in the Center for Educational Development building, 1855 Folsom Street (at 15th Street); Personnel in the Laguna Honda School on Sixth Avenue between Judah and Irving Streets. All actions taken during open enrollment are effective January 1, 1985. For further information see your department benefits representative or call x1843 or x1400.

Deadline for submitting individual investigator research grants is Monday, December 3.

All Academic Senate members, non-Senate faculty members and those with pending appointments are eligible to apply for funding in all subject areas. Faculty on sabbatical are eligible for supplies and equipment only.

Research guidelines and application cover sheets are available from Annie Bruster in the Academic Senate Office, U 100H, or call x1307.

A new Family Health Gallery has just opened on the fourth floor of the School of Nursing building, featuring photographic studies produced by the Department of Family Health Care Nursing's Visual Media Research. Student, faculty and VMR staff work is on display, covering the main themes of child care, aging and cross-cultural observation.

The Department of Family Health Care Nursing graciously thanks professor Betty Highley and her associates in photography, Tom Ferentz, Michael Dawson and Brigham Dennison, whose work has made the gallery possible.

The gallery is open Mondays, Wednesdays and Fridays from noon to 1 p.m.

Private support for the University of California, which has been increasing steadily for several years, reached a record $215.7 million during 1983-84, UC President Gardner has reported to the Regents.

The figure represents a 37 percent gain over the 1982-83 total of $157.5 million, according to Gardner.

Combined support from private sources for the individual campuses for 1983-84 (with 1982-83 figures in parentheses) are: UCSF $27,856,305 ($26,411,284), UCB $48,738,764 ($32,662,768), UCD $12,131,186 ($11,507,247), UCI $15,061,122 ($10,080,850), UCLA $74,564,655 ($46,296,762), UCR $2,327,334 ($1,690,126), UCSD $25,260,711 ($21,701,161), UCSB $4,530,967 ($3,612,575), UCSC $3,745,897 ($2,263,397).

Hospice of San Francisco has been caring for AIDS patients in their own homes since 1982. Although active medical treatments for AIDS-related diseases are provided through various medical centers—primarily UCSF and SFGH—hospice care has shown that the chronic symptoms of debilitated and sometimes dying AIDS patients can often be managed at home, according to Jeannee Martin, program director.

Established by a grant from the City and County of San Francisco, the AIDS Hospice Program provides attendants and a multidisciplinary team of health professionals, as well as bereavement counseling.

Physicians wishing to make referrals should contact Martin at 285-5619. Anyone wishing to volunteer their services or make a donation also should call that number.

The campus is forging ahead with its housing and beautification efforts.

Renovation already has begun on two houses on Kirkham Street and one at 1490 Fifth Avenue, as part of UCSF's policy to return houses used for administrative and academic programs to residential use. Work on the three homes has begun, including installing planters, decks, new kitchens, bathrooms, skylights and entry areas. In addition, renovations soon will begin on a fourth residence at 1320 Third Avenue.

Revenues from campus-owned homes will be used to manage and improve these and the balance of the Third and Fifth Avenue residences, according to Tom Rolinson, vice chancellor, Resource Management and Planning Services.

Recent campus beautification efforts to use space more efficiently and to create a warmer and more attractive campus include:

- HSW 300 classroom expanded and improved.
- An elevator lobby area in the Health Sciences Towers (HSW/HSE) refurbished to include new wood flooring, photo murals, seating and planters. This will be a prototype for future HSW/HSE lobby renovations.
- Blue and gold banners and photo murals representing each of the nine UC campuses hung in the corridor along the Irving Street entrance of the Ambulatory Care Center. Local merchants are being invited to lease space in this area.
- Additional awnings installed along Parnassus Avenue and Irving Street.
- Millberry and ACC garage areas color coded and more lights installed. Further garage changes to occur next year.

Works by painter Chester Arnold and photographer Tori Hafer will be on display at the Faculty/Alumni House from December through February with a reception for the artists on Thursday, December 6, from 4:30 to 7 p.m.

Arnold's UC exhibit deals primarily with architectural excavations and ruins. Born in Santa Monica, he went to high school in Munich and returned to study painting at the College of Marin.

Hafer has an attraction to Etruscan history and is showing photographs of Italy, the birthplace of her father. She attended Fresno College and studied photography at the College of Marin and with the Friends of Photography in Carmel.

The campus has joined the San Francisco Fire Fighters in their 34th Annual Toy Drive for San Francisco needy children. Toys collected from the drive are given to children who would not be receiving presents during the holidays.

Anyone who has new or used toys for children up to age 13 can deposit them from Monday, November 26 to Monday, December 17, in toy barrels in several campus locations: the lobbies of the Ambulatory Care Center, Medical Sciences, Moffitt, old UC Hospital; Moffitt Cafeterias' Golden Gate Room, the Personnel Office, third floor lobby of CED, and Oyster Point lobby.

For further information call Brenda Sanchez at x4021.

"Celebrate Cyril" is the name of a gala event to be held Wednesday evening, December 5, in the new Ramada Renaissance Hotel, located on the newly-named "Cyril Magnin Street" just above Market and Fifth Streets, SF. It will honor the well-known San Francisco civic leader and philanthropist.

Funds from the event will benefit the world-famed UCSF Brain Tumor Research Center.

The Ernie Heckscher Orchestra, the Peter Mintun Trio, Turk Murphy and His San Francisco Jazz Band, pianist Bob Moonan and the Royal Society Jazz Band will provide the entertainment.

Tickets at $150 each are available by calling Madlyn Day at (415) 433-7940.

Some 30,000 Americans are stricken annually with brain tumors, killing more children under 15 than any other disease except leukemia, according to Friends of the UCSF Brain Tumor Research Center president David Plant.

Persons who read and write Chinese are needed for a UCSF study aimed at preventing depression.

Director of the project is Ricardo F. Muñoz, PhD, UCSF associate professor of psychology at SFGH. It is one of the few studies in the country aimed at preventing depression before it occurs, rather than treating the problem after it has developed. Muñoz already is conducting similar studies with English- and Spanish-speaking persons.

Participants who are accepted into the program can earn up to $60 by filling out questionnaires and completing a total of six interviews. Half of the members also will be randomly assigned to attend an eight-session class that will cover tested methods of coping with stress and depression.

Participants must be able to write and speak Chinese, be between the ages of 18 and 69, and not presently be seeking psychiatric treatment.

For further information call Florentius Chan at 821-8646.

The Bank of America has installed two Versatellers at its Parnassus Heights branch at 350 Parnassus Avenue.

Accounts formerly at the Parnassus Heights branch have been consolidated into the Sunset branch at 800 Irving Street. Parnassus Heights account holders still can use their existing checks and savings passbooks. However, two customer service representatives will be available at the Parnassus branch on Mondays to Thursdays from 9 a.m. to 4 p.m., Fridays to 6 p.m. and Saturdays 8:30 a.m. to 3 p.m. to take loan applications, open new accounts and market travelers checks and other bank investment products.

For further information call Richard Beebe at 622-5047.

IN MEMORIAM

John C. Lee. A member of the campus community for 15 years, Lee came to UCSF in 1958 as a resident in pathology. He became an instructor in 1962, assistant professor in 1964 and associate professor in 1970. He went into private practice in 1973 and joined the pathology group at Sutter Memorial Hospital in Sacramento. The coauthor of more than 50 publications, Lee was a member of the American Society of Nephrology, the Sacramento County Medical Society and California and American medical associations.

The School of Dentistry has a Preventive and Family Dental Service committed to teaching individuals the best ways to prevent various types of dental disease such as cavities, gum disease and tooth loss.

Nutritional counseling, plaque control methods, fluoride treatments, self-checks for oral cancer, professional dental cleanings and regular dental examinations are stressed by the service. Suggestions on any necessary dental treatment and recommendations on how to best care for individual dental needs will be made.

The Preventive and Family Dental Service can make various financial arrangements. Staff members also will help patients fill out and process dental insurance forms.

Offices are located in Room D 1050 on the first floor of the new School of Dentistry building, 707 Parnassus Avenue. To make an appointment call x1536.
